

**From:** Vann, Bradley

**Required Attendees:** Washburn, Ben; Juett, Lynn; Erin Harman; r s; Dawn Chapman; Bob & Jean Nowlin; Gale Thackrey; Harvey Ferdman; Terrie Boguski; Mary Catherine; Kirby Webster; Milward, Mark; Gwendolyn Verhoff; Doug Clemens; Ed Smith; Debi Disser; Hooper, Charles A.

**Location:** R7-RO1.2-A20-20/R7-RO

**Importance:** Normal

**Subject:** West Lake Landfill - CAG Technical Committee call

**Start Date/Time:** Mon 10/19/2015 9:00:00 PM

**End Date/Time:** Mon 10/19/2015 10:30:00 PM

Call Line: 1-866-299-3188 Code: 913551788

Appreciate everyone's flexibility in moving the call earlier on Monday. Right now there is a proposed agenda (per Ed) which can be finalized Monday morning. Thanks again.

Proposed agenda

- 1) Update from EPA regarding progress on the isolation barrier and ongoing tests for the ROD amendment
- 2) Discuss what topics/issues we want to address for future CAG meetings. I would like to have a meeting in the near future (accompanying the release of the radioactive testing for the isolation barrier) with EPA & Corps.
- 3) Discuss the EPA's air monitoring report (as noted by Terrie in her email on 10/14) and the role TASC will play in the upcoming CAG meeting. Terrie may not be available to do a presentation if her grandchild is born, so we will need to have a contingency for the presentation. I hope Erin Harman will be able to participate if we discuss the EPA's air monitoring report and that we are able to see the report before the meeting (if possible).
- 4) Given the recent release of the ATSDR report, I'd like to add a discussion of the report to the agenda. I'd also like to discuss how surface fires in the Chernobyl exclusion zone have dispersed radioactive materials, including Plutonium, which has a similar atomic weight to the radioisotopes found at the West Lake Landfill. Below are two studies of fires in the Chernobyl zone for EPA's review and use as it determines fire risk at the site.
- 5) Miscellaneous items (catch all).
